

Digital Health Startup looking for **(Junior) Python Developer (f/w/x)**

(full-/part-time, based in Hamburg)

Company Description

aidhere is a digital health startup working on an app-based digital therapy that helps people live healthier lives and overcome obesity. We are enabled through new legislation (Digitale-Versorgung-Gesetz) that allows us to become a physician prescribed, certified app that is free to patients and paid for by health insurances. We are the only company offering a multimodal therapy approach (nutrition, behavior & exercise) up to medical treatment guidelines. We have successfully raised more than half a million in a seed round from leading angel investors and are now focused on the product. Join our incredible team of entrepreneurs, technologists, and medical experts who have a collective passion for health.

Your role

- We are hiring a Python Developer position that will allow you to expand your capabilities, help build up the company and advance your career in a fast-paced startup environment
- As part of our Team you will be able to self-manage, set your own hours and work remotely
- However, as a tech startup there is an opportunity for growth and those with experience in similar areas are encouraged to apply
- With us you will be able to grow your skills with a team on the cutting edge, lean hierarchies and get to know the intricacies of the healthcare industry

Your profile

- You have several years of development experience with Python (particularly Django)
- You have experience with Google Cloud (nice to have)
- You have a good technical understanding and have a good knowledge in HTML, CSS, and JavaScript
- You speak fluent English and ideally also German
- You like to think beyond and outside of your tasks
- You get excited in working in an agile environment

What we offer

- Chance to support shaping a fast-paced startup with the option to grow your position as we expand
- A high level of trust and autonomy combined with a dynamic and feedback-seeking culture that fuels personal growth
- Flexible working hours (including home office), quick decision processes
- A competitive, performance-oriented compensation package including options
